REASONS FOR ALLOWANCE

1. The claims 1-20 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a structure as in claims 1 and 12 and method as in claims 13 and 20, of a heat sink assembly within a potted housing with “a self-tapping screw” wherein “said heat-containing element is *maintained in a fixed position* within said housing by said bracket prior to said filling with said potting material. (emphasis added)” The aforementioned limitations in combination with all remaining limitations of the respective claims are believed to render said independent claims 1, 12, 13 and 20 and all claims dependent therefrom patentable over art of record.
2. The closest references to the present invention are believed to be as follows:
Johns et al. (US 3,522,486) teaches a heat sink assembly within a housing having potting material, a bracket and a heat-containing element, but fails to teach a bracket being used to maintain (support) and fix the position of the heat-containing element.
Prager et al. (US 4,288,839) teaches a heat sink assembly within a housing having a bracket, a heat-containing element and a self-tapping screw but fails to teach a potted housing. These above listed references all lack the specific structure and arrangement in claims 1 or 12 and method in claims 13 and 20.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
